

Point-of-Care Dispensing Solutions Since 1984

Pharma Pac partners with healthcare providers such as urgent care facilities, onsite employee health clinics, private practices and student health centers to provide compliant, end-to-end, point-of-care dispensing solutions.

Why Pharma Pac?

We are more than just a dispensing solutions provider. We help you manage the dispensing process for improved patient adherence with no requirement of extra time or staff.

Our automated process including pre-packaged medications and automated label printing, helps to maximize ease-of-use and minimize the impact of providing dispensing services in your location.

Helping healthcare providers give patients a level of confidentiality and convenience that isn't available with the traditional doctor/pharmacy relationship.

>> To find out more about our process, contact Ken Barnes at ken.barnes@pharmapac.com or call 614.327.3905.

What is point-of-care dispensing?

Point-of-care dispensing, also referred to as in office medication dispensing, gives you the ability to prescribe and dispense medications for your patients onsite. Before your patient leaves your office, they're getting the medication they need, giving them an immediate start on treatment.

In office medication dispensing provides convenience for your patients and for your office. Spending less time on pharmacy calls, fax requests, etc., allows more time to focus on patient care. Not to mention, you're gaining another revenue source for your practice by reinvesting in your operation.

As a company, we are large enough to meet your point-of-care dispensing needs competitively, yet small enough to tailor our service to exceed your expectations. We partner with you to create a dynamic & compliant program, allowing you to:

Lower Medication
Cost

Improve Patient
Adherence

Streamline Your
Operations

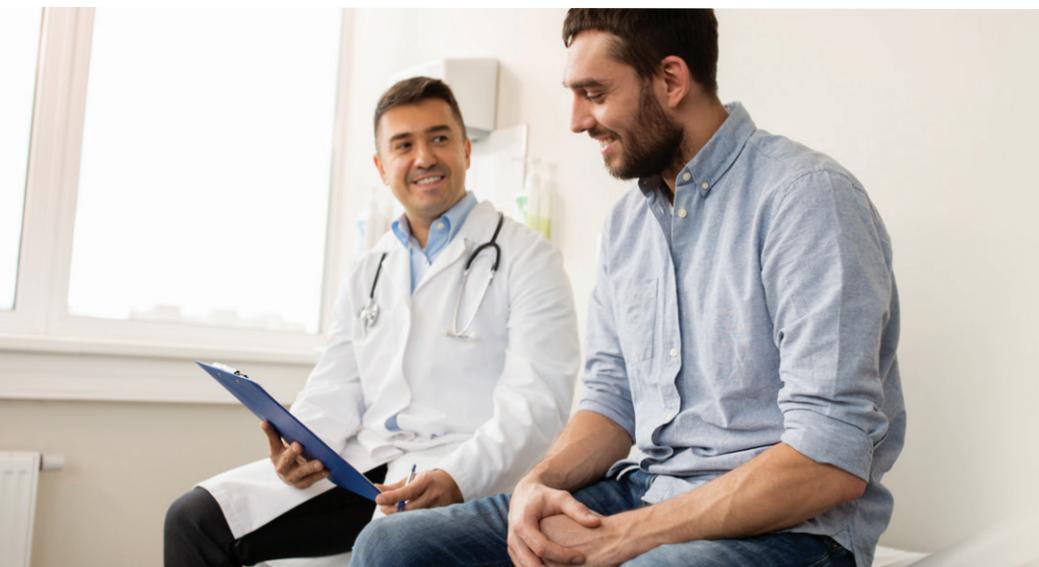

Enhance Your
Revenue Streams

>> If you would like to improve any of the above, contact Ken Barnes at ken.barnes@pharmapac.com or call 614.327.3905.

In office medication dispensing means less steps from prescription writing to dispensing, which results in:

- Increased patient satisfaction and trust
- Enhanced relationships with your patients
- Fewer medication errors
- Positive, word-of-mouth referrals

Contact us today for a complimentary consultation with one of our Pharma Pac experts to see if in office medication dispensing is right for you.
